Company

EXPERIENCE

IPlatforms is an Italian company specialized naval technological systems used for boats and vessels, offshore, ferries, cruise ships and yachts. technical hulls in the field of special transport and barrier gates to the sea.

SAFETY AND PROFESSIONALISM

The design and the research of suitable products define IPlatforms as a reference company in the naval sector. High quality engineering solutions, state of the art technology and works, and a precise choice of components, guarantee maximum safety at sea.

WARRANTY AND ASSISTANCE

The vision of the IPlatforms professionals aims to welcome and support customers in order to guarantee a personalized service, aimed at helping to achieve their goals, always offering guarantees and assistance.

Naval Technological Systems

Barges

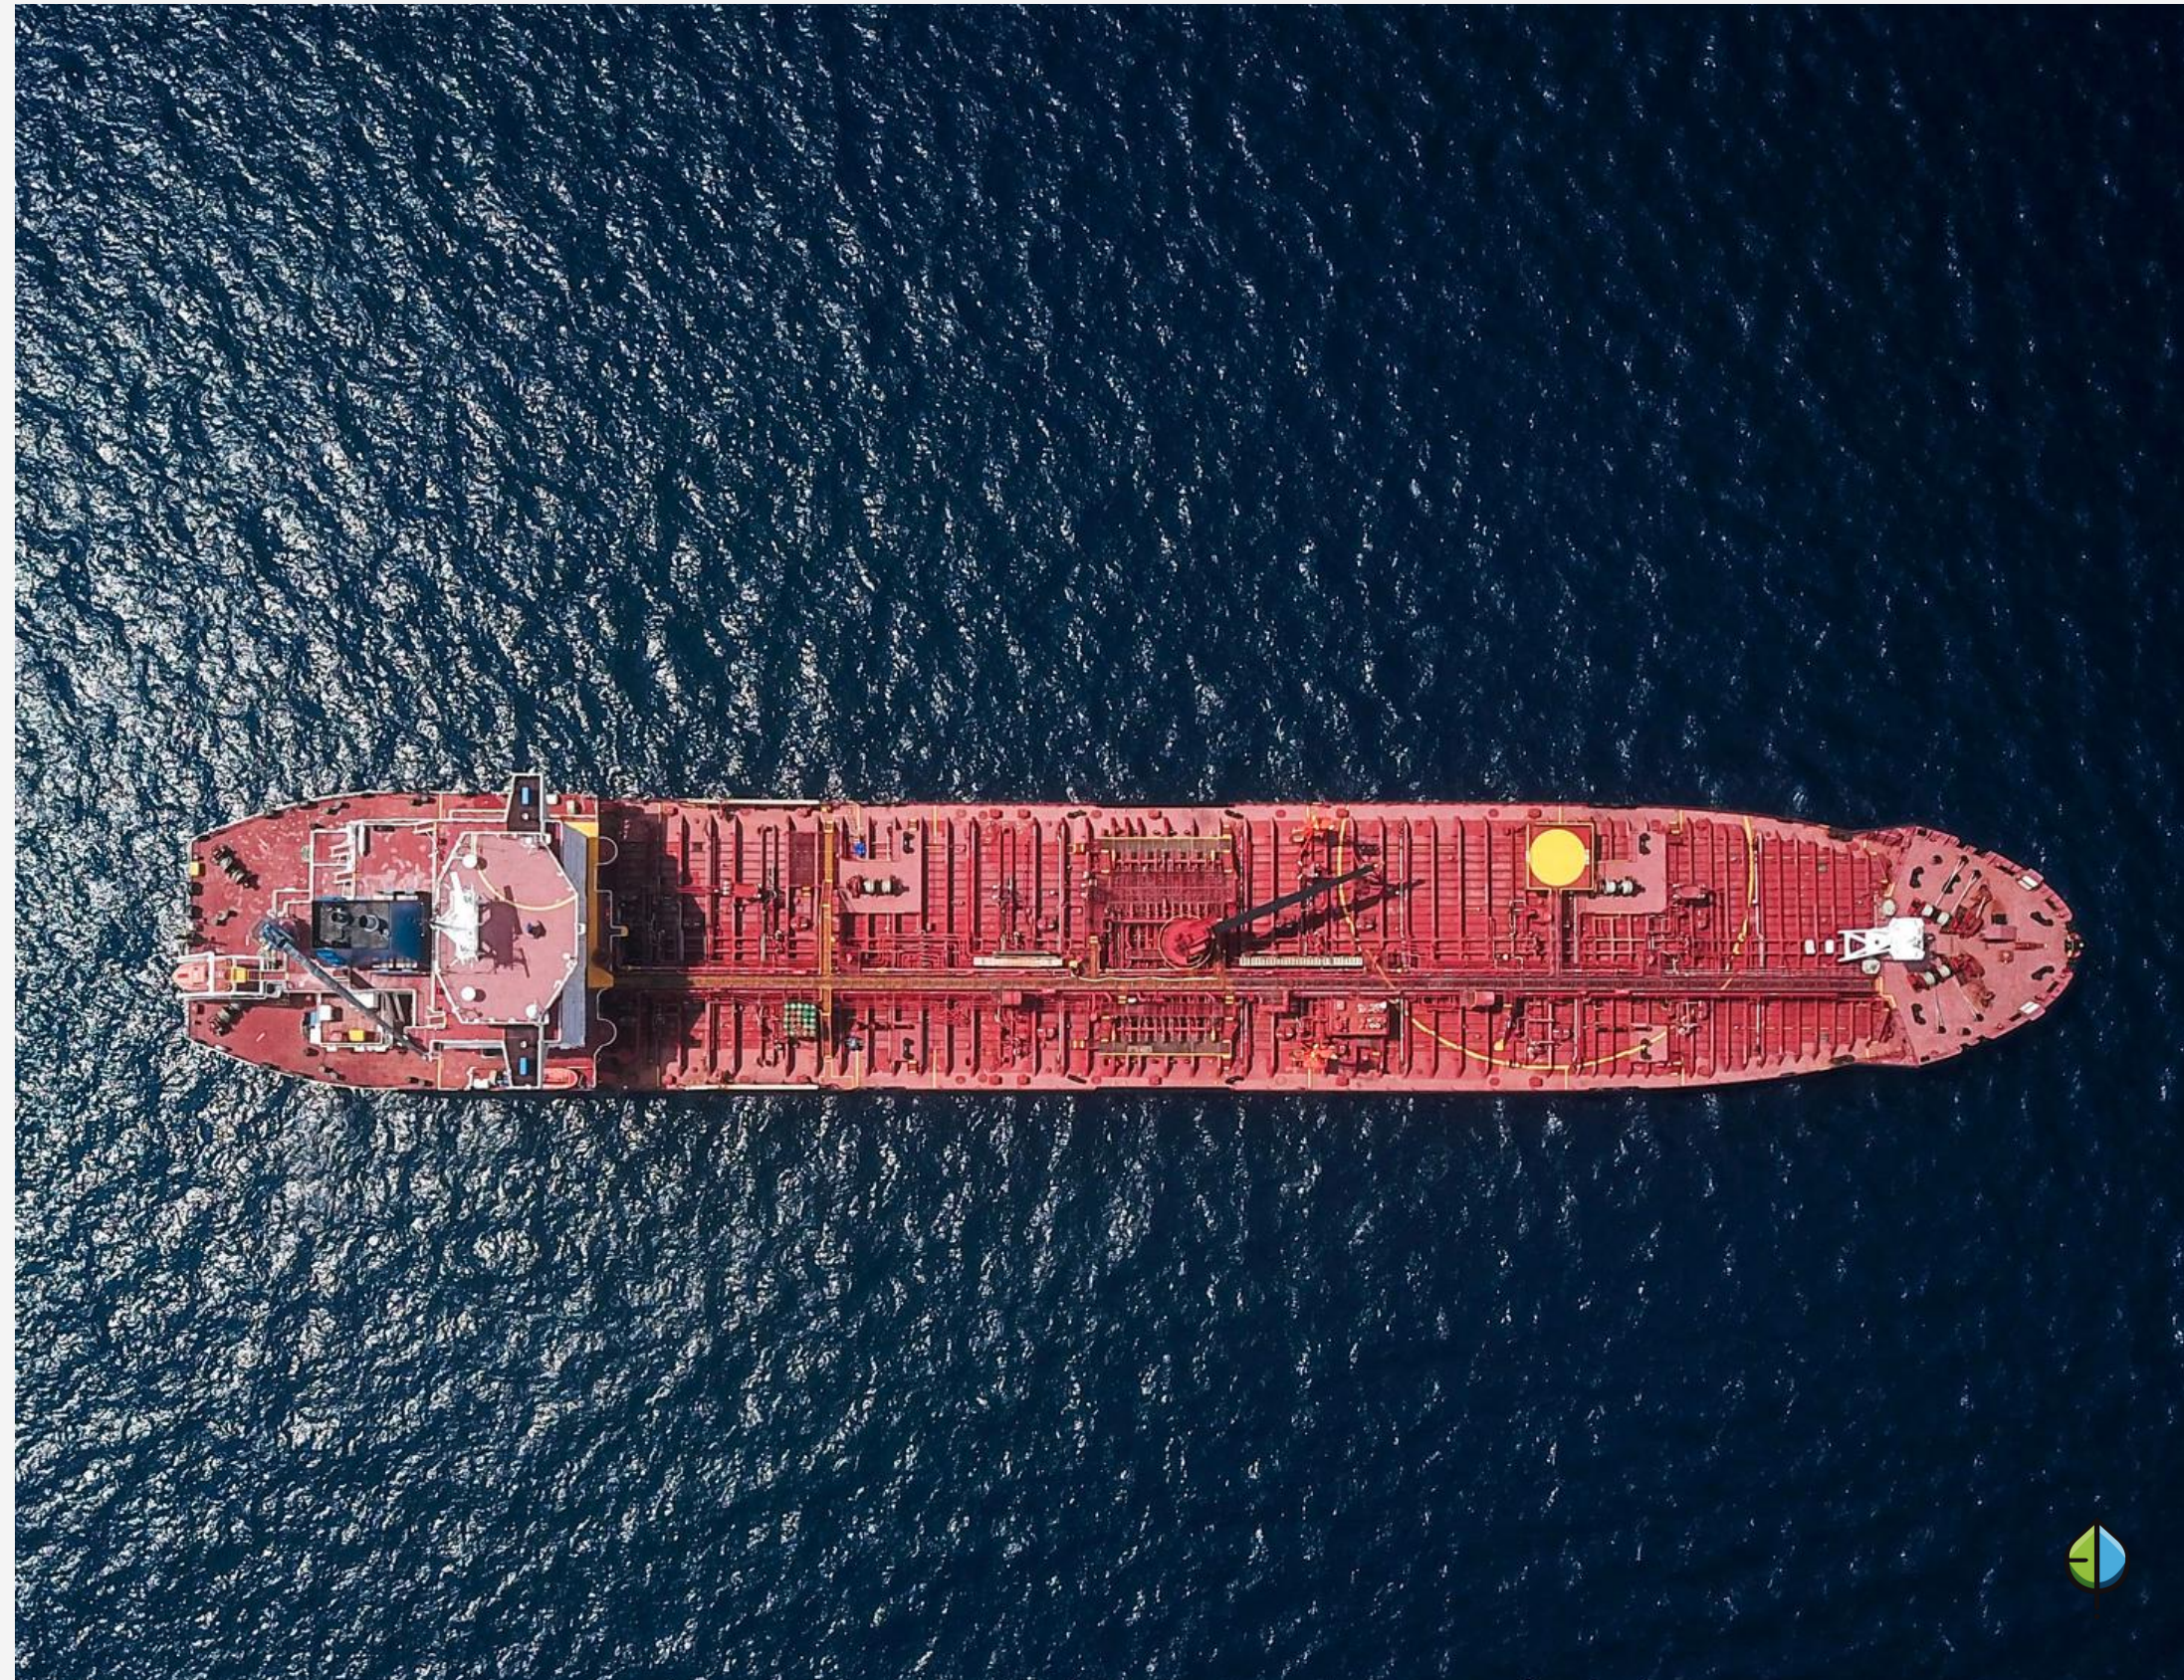

We provide ballasting and balancing systems for offshore naval structures.

IPlatforms offers on-board technologies for floating production units with related fittings and systems.

We build systems for cargo ships and container carriers with buoyancy and stability control systems.

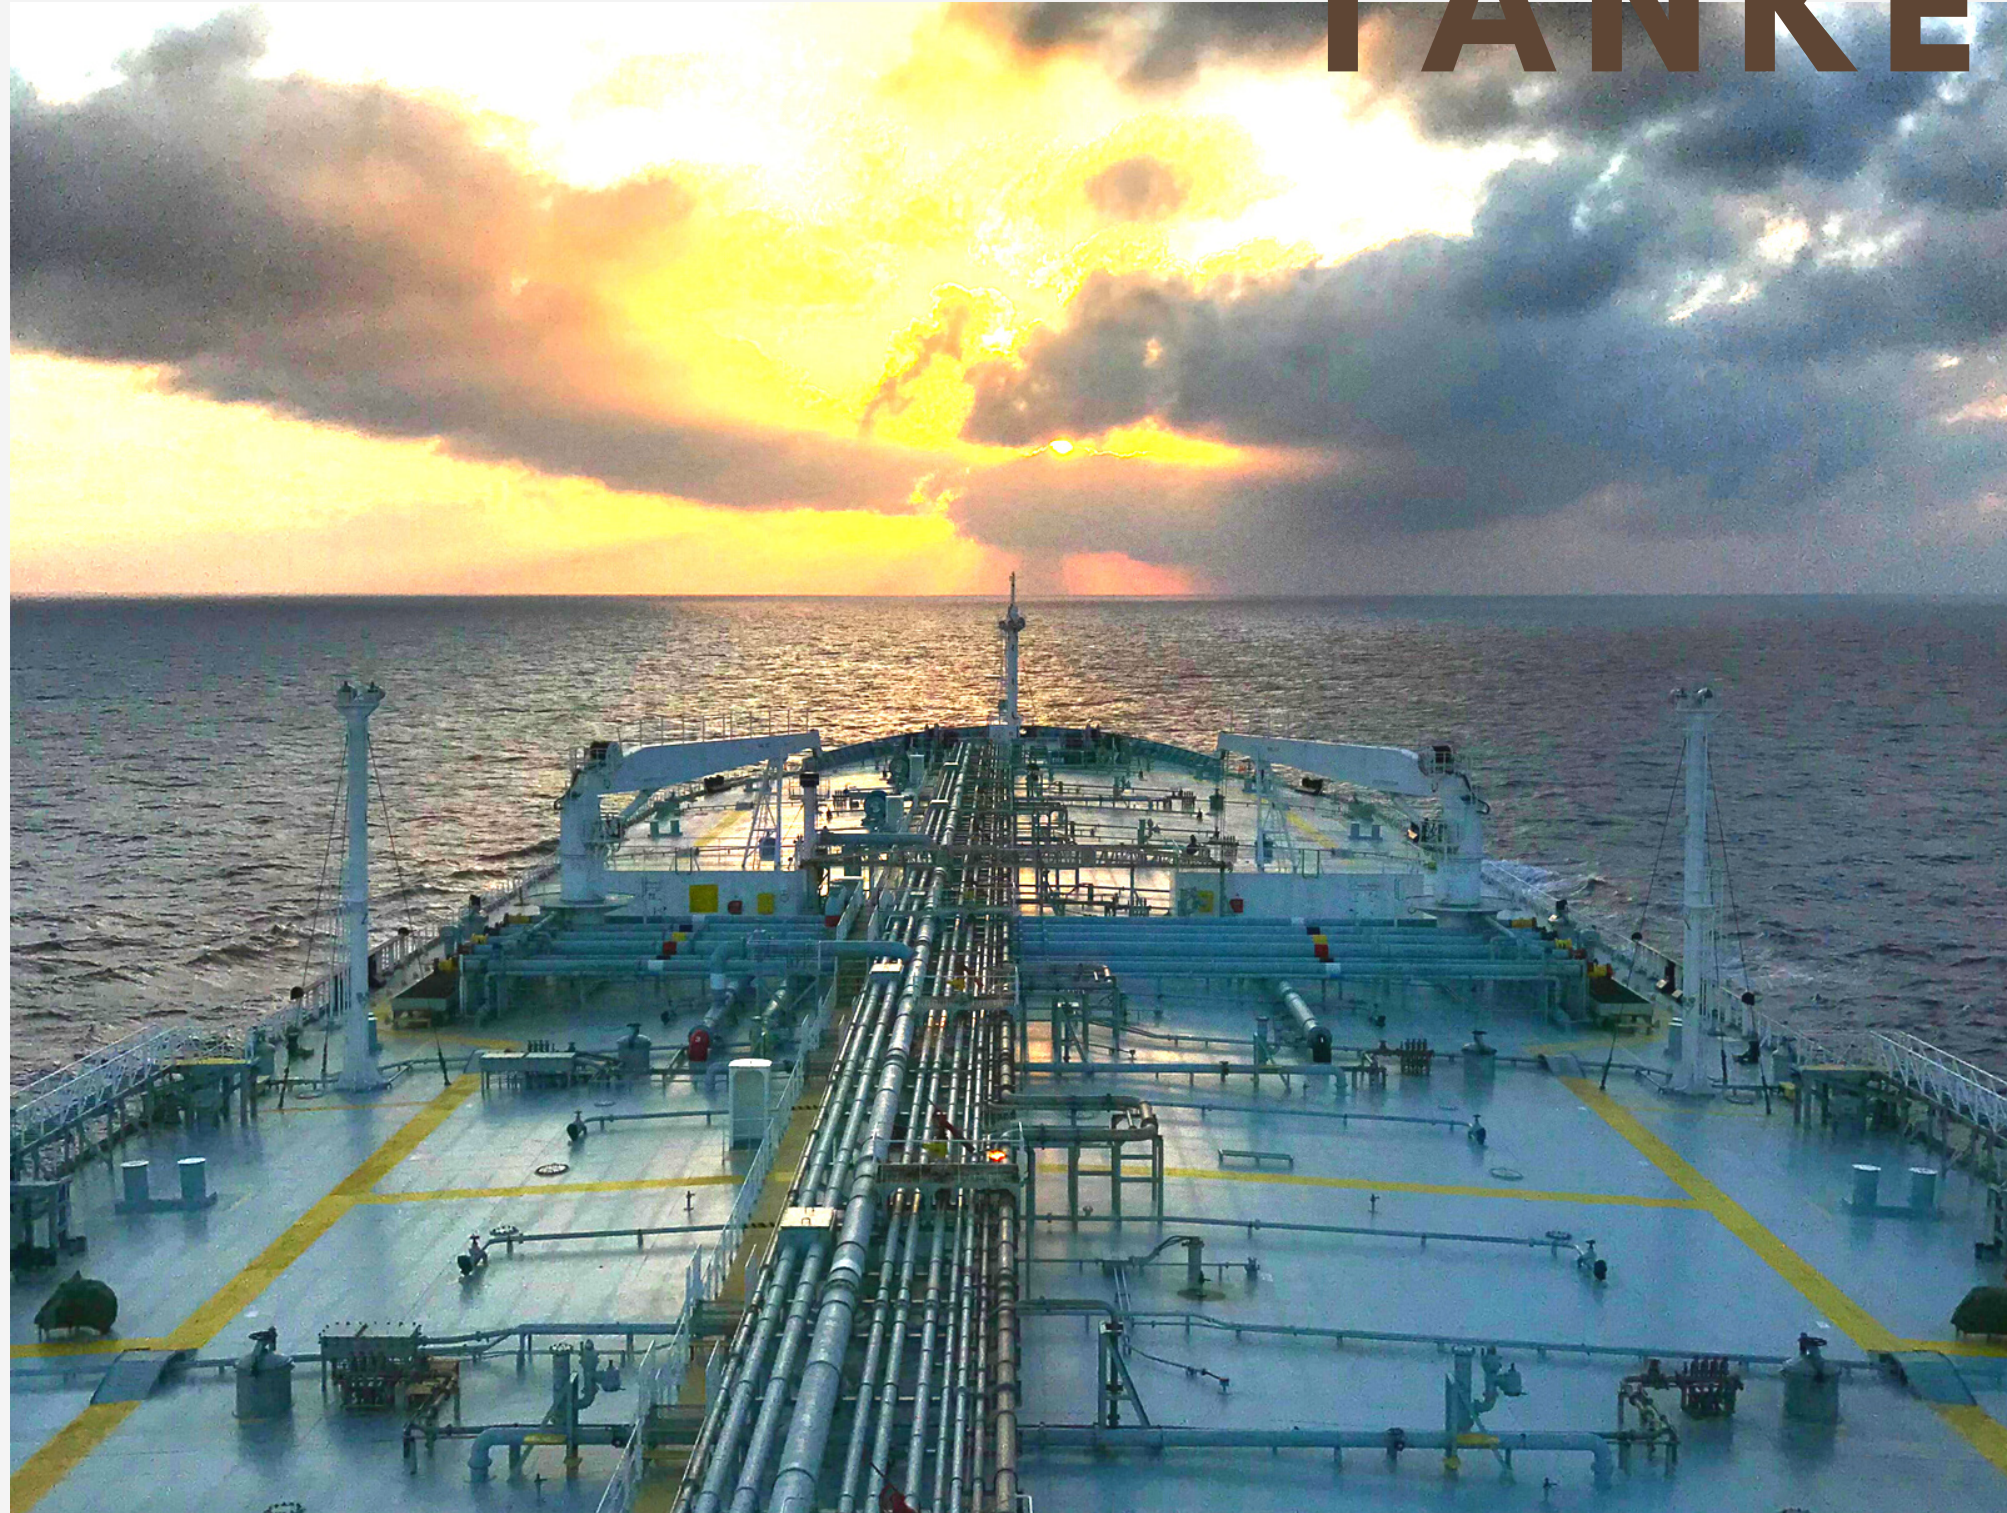

IPlatforms operates in the sector of technological systems for thermal energy production and primary water treatment plants.

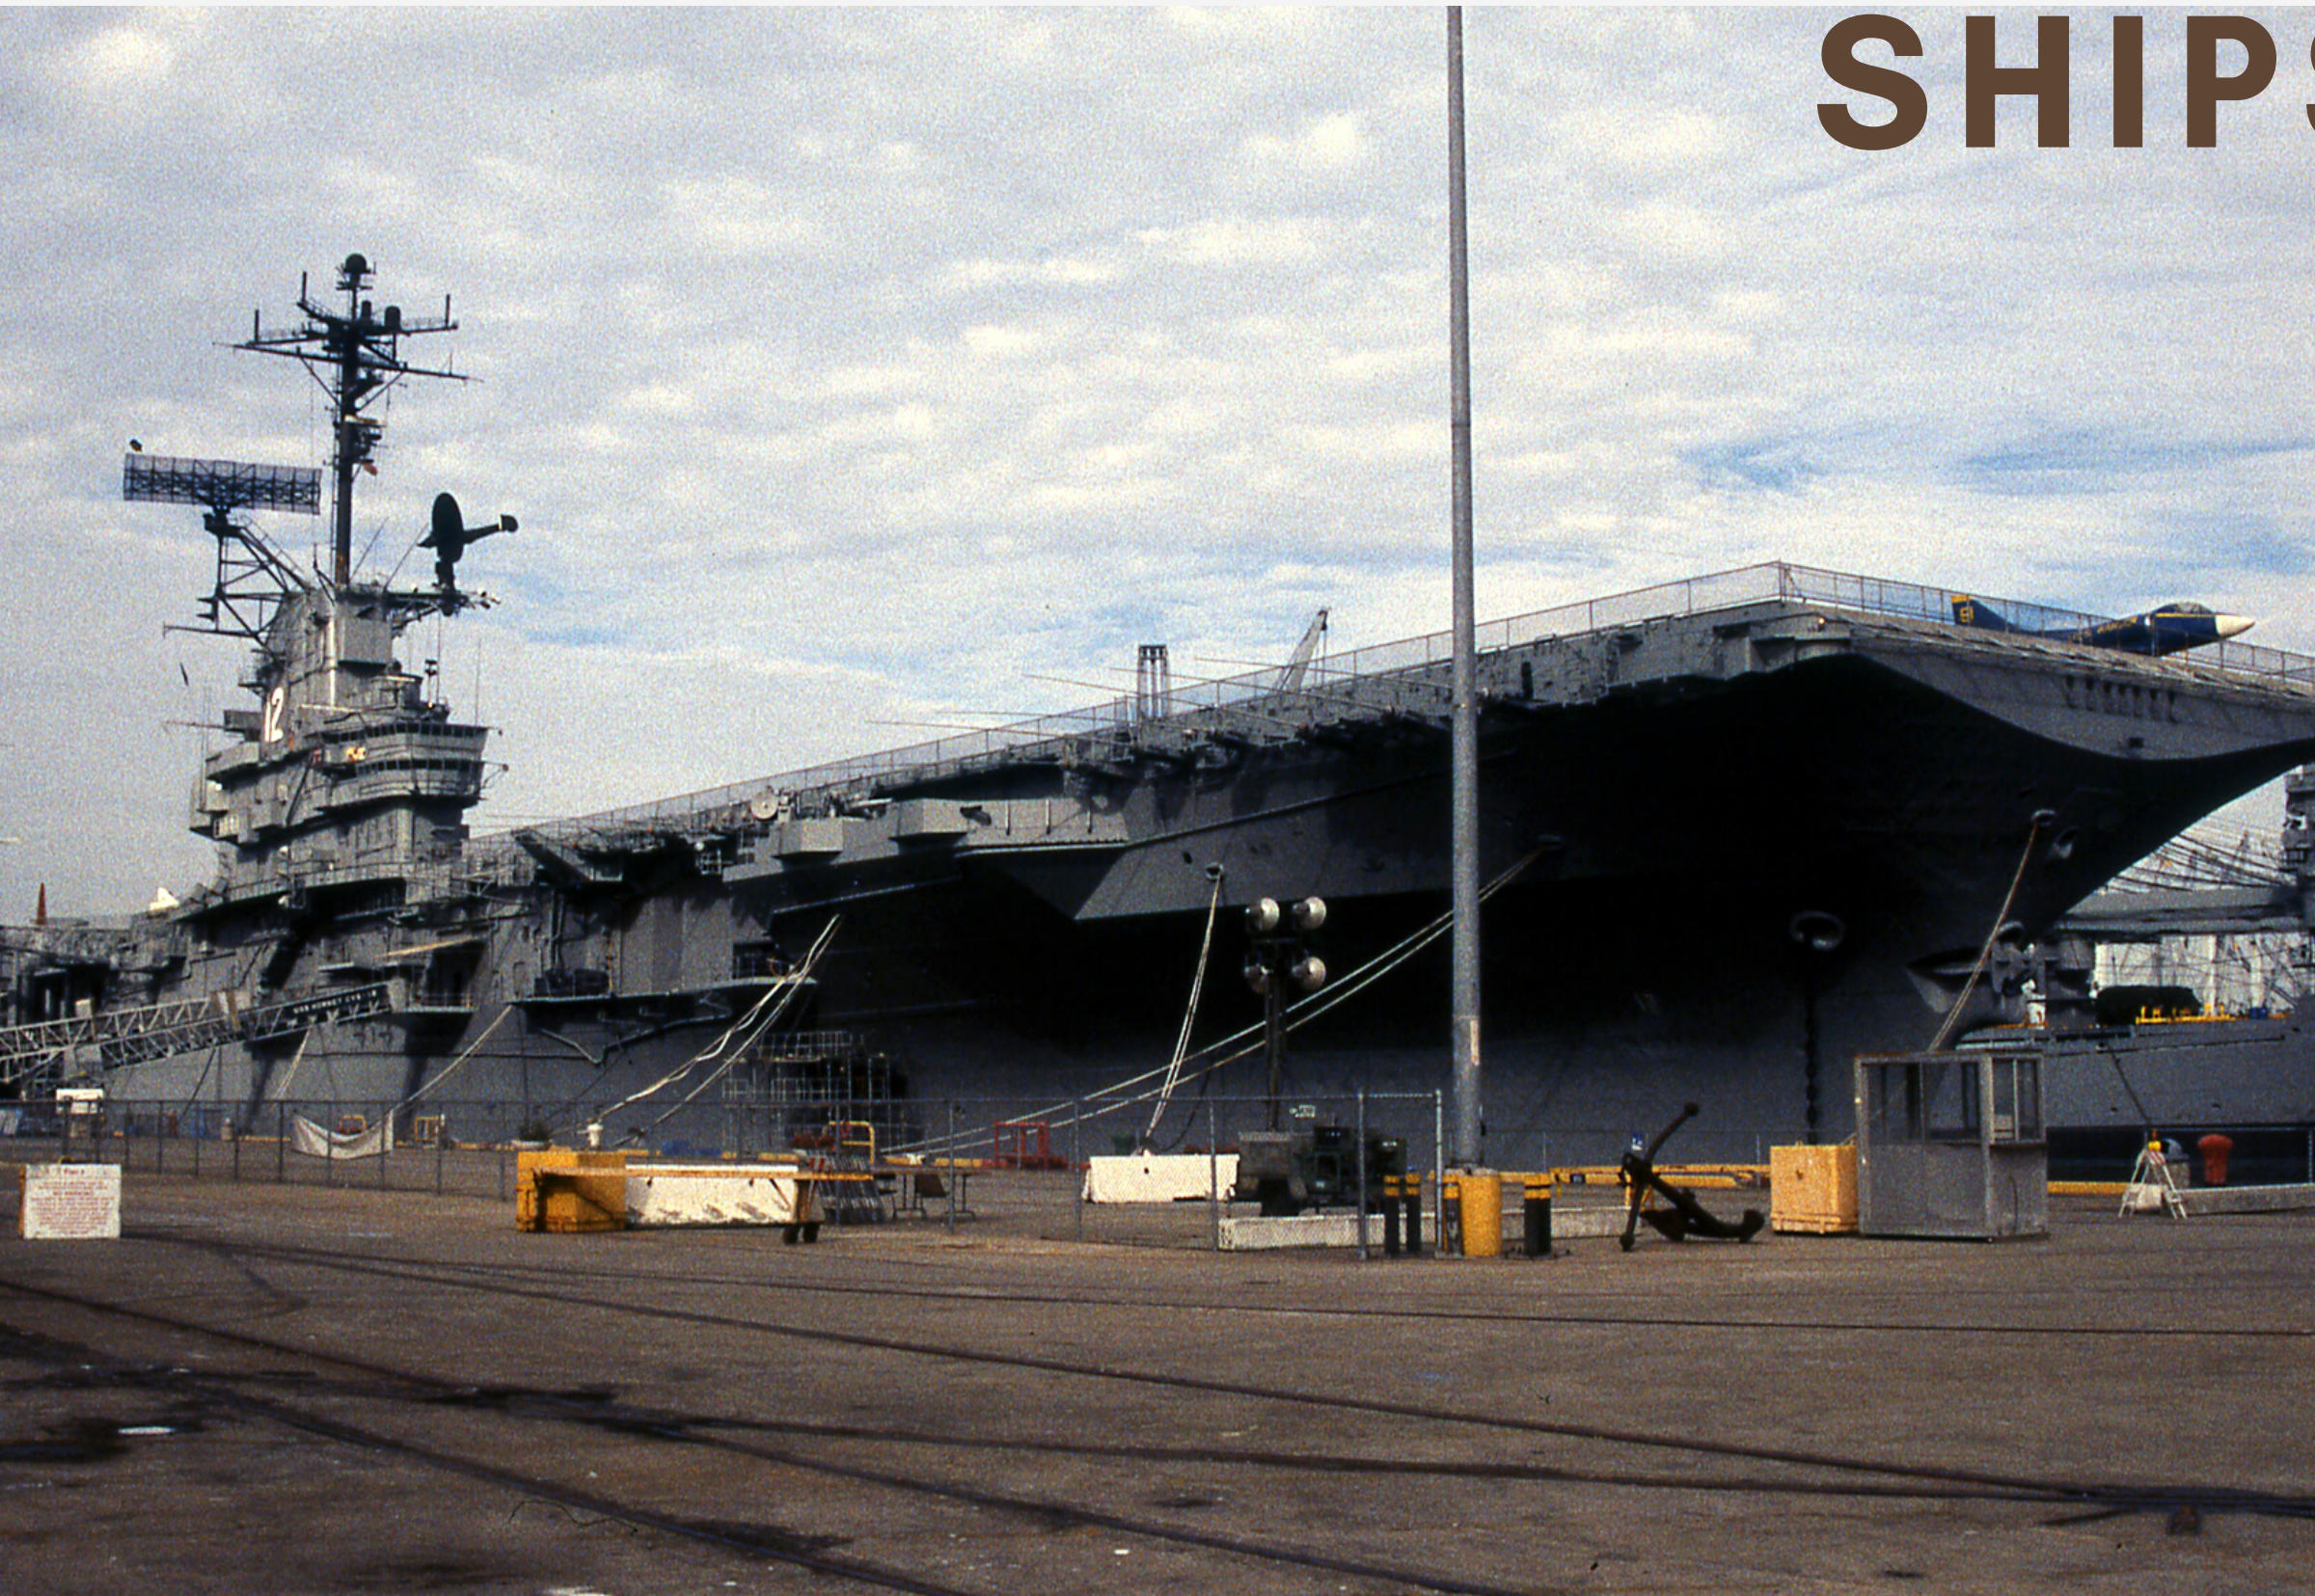

TANKERS

We build safety systems on tankers for the Oil & Gas sector with particular attention to fire prevention systems.

MILITARY SHIPS

IPlatforms supplies UNAV-compliant systems for Navy vessels.

Cruise ships

IPlatforms professionalism provides fresh water production plants with desalination and sanitary circuit systems.

We design and offer technologies dedicated to steam systems for thermal power plants on board ships, guaranteeing the supply of spare parts for maintenance.

SAFETY SYSTEMS FOR YACHTS

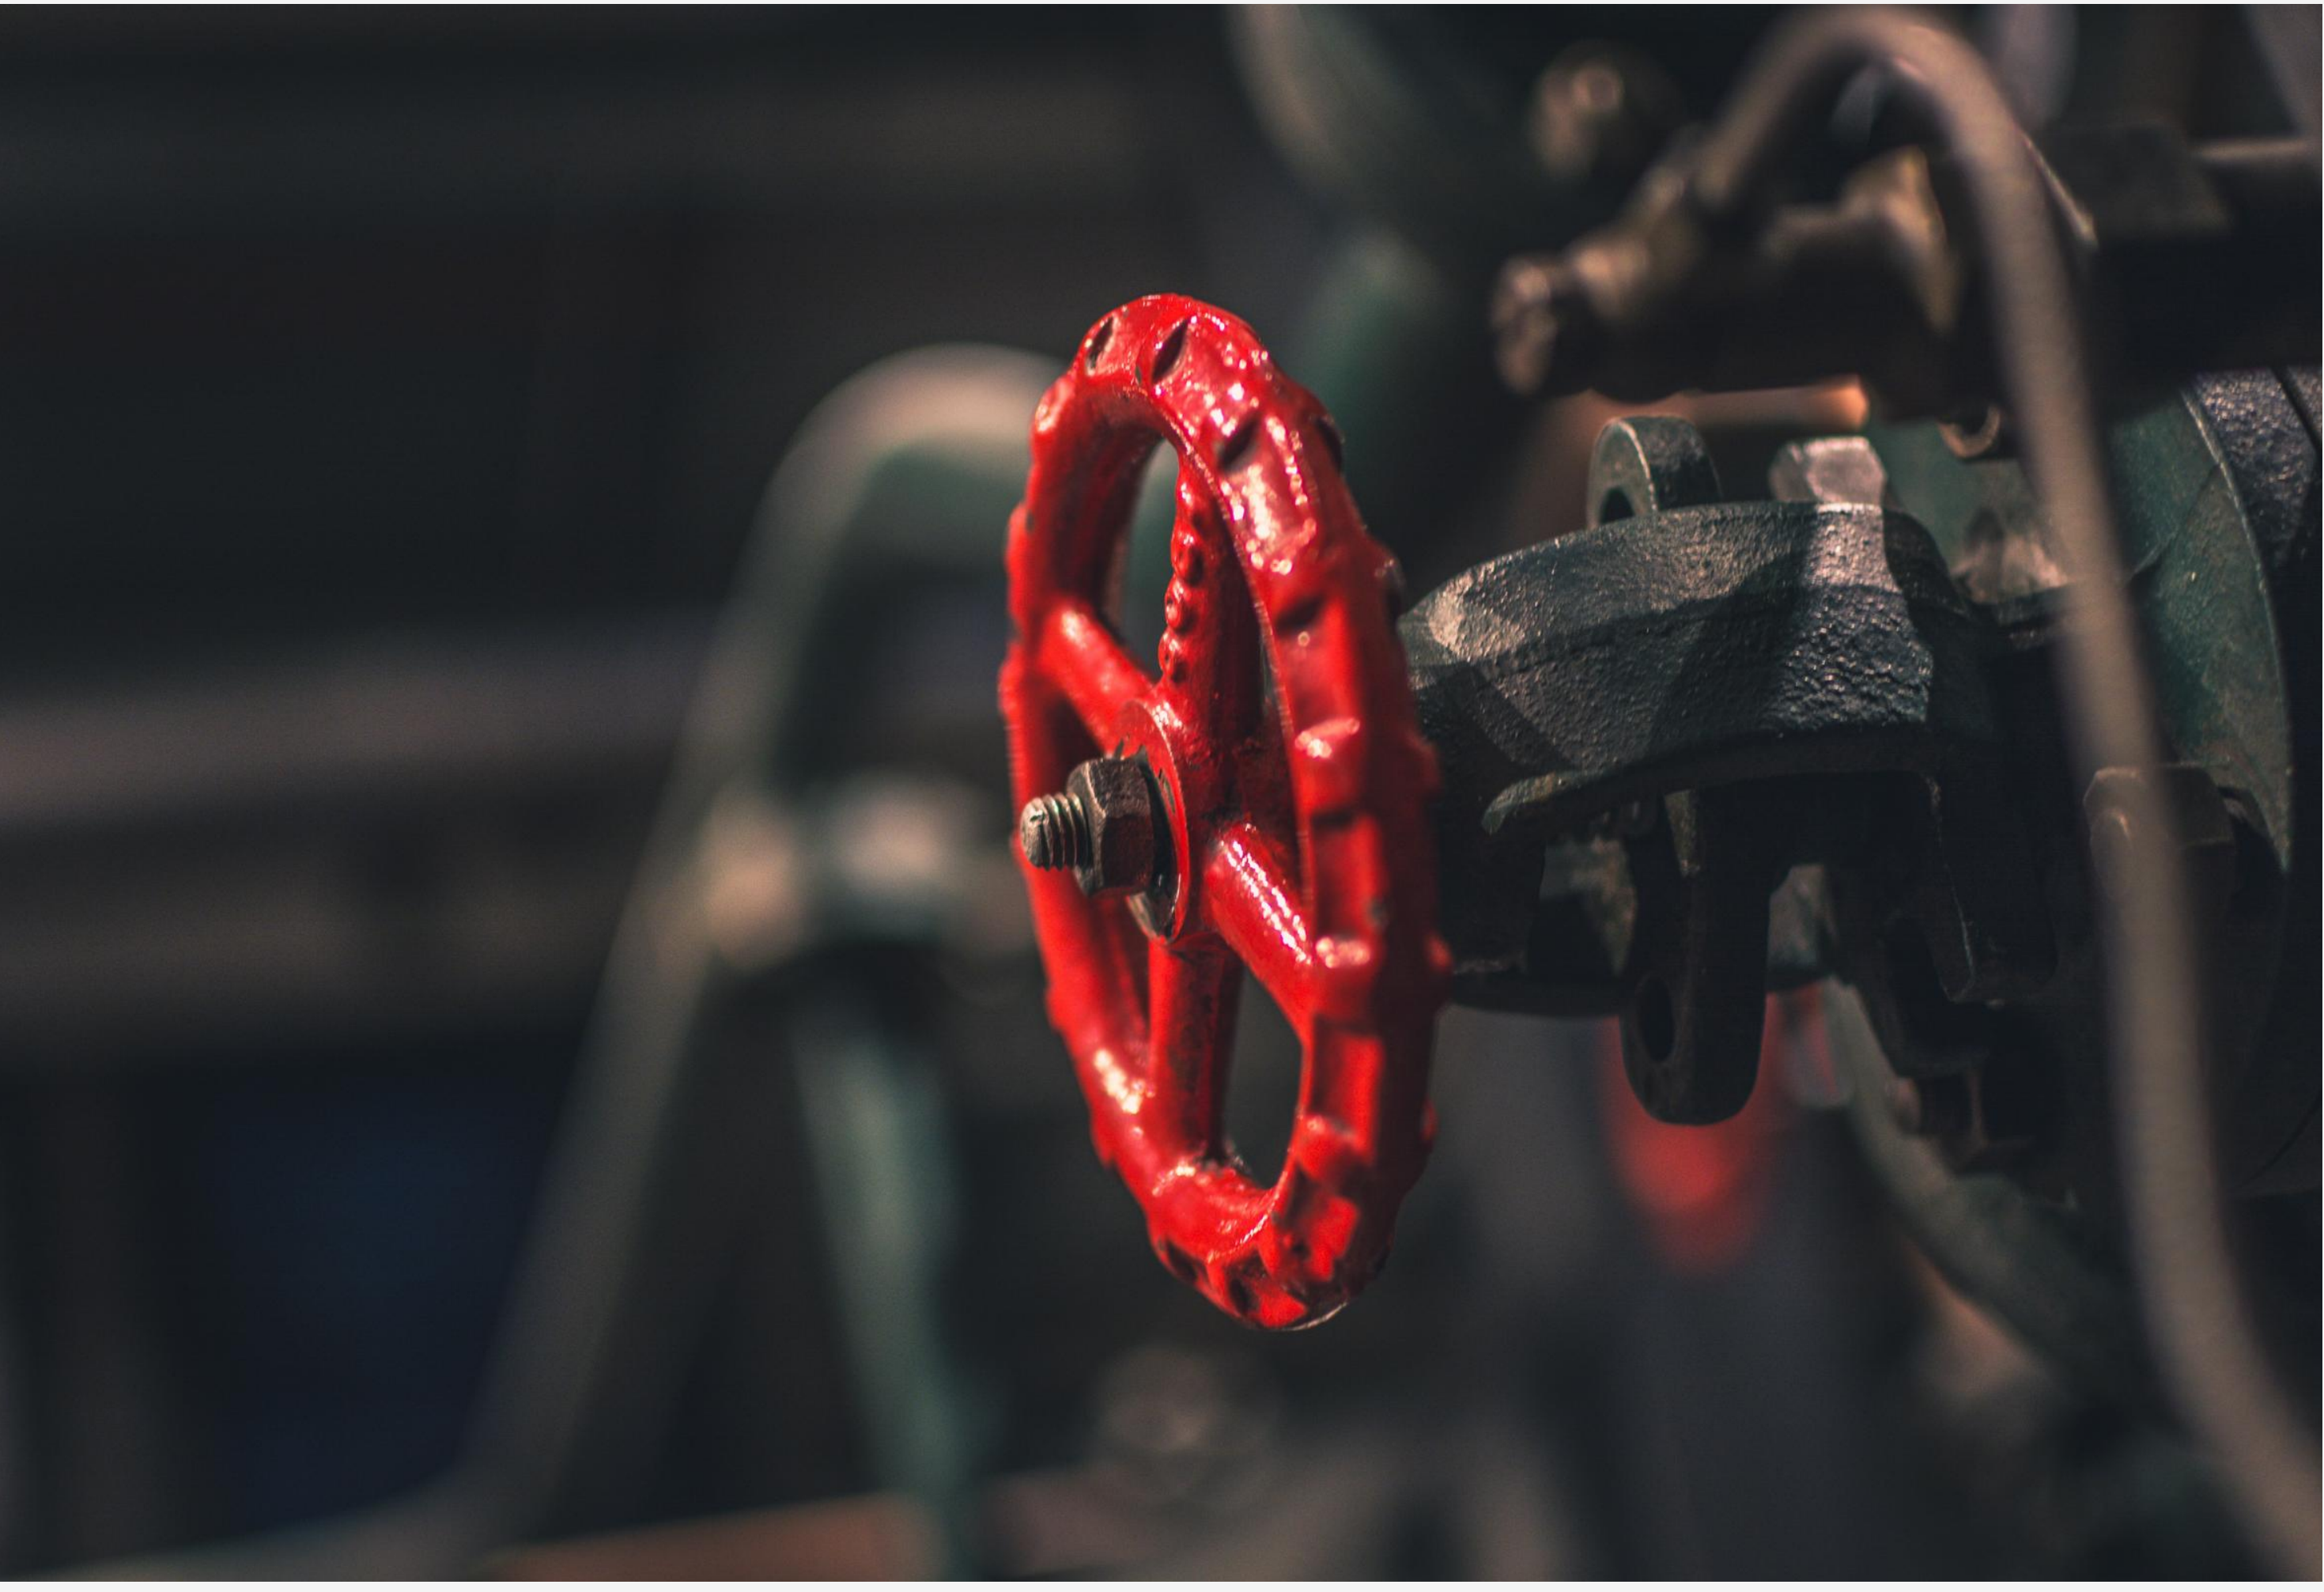

We make your dreams come true with prestigious fittings, carefully selected by our experts.

Technological systems

Platforms supplies firefighting technologies with fluid distribution for the safety on ships.

Safety and reliability on board

With years of experience, IPlatforms is specialized on on-board maintenance for different types of ships.

FINISHES AND FURNITURE

We supply, customize and lay all the design elements for cruise ships, ferries and Yachts.

All our projects and interventions are the result of a careful combination of our professional experience and our satisfying our clients' goals.

We design and build innovative structures and water treatment plants.

We complete our interventions with recreational aquatic structures such as swimming pools, water games and wellness centres.

COMMISSIONING

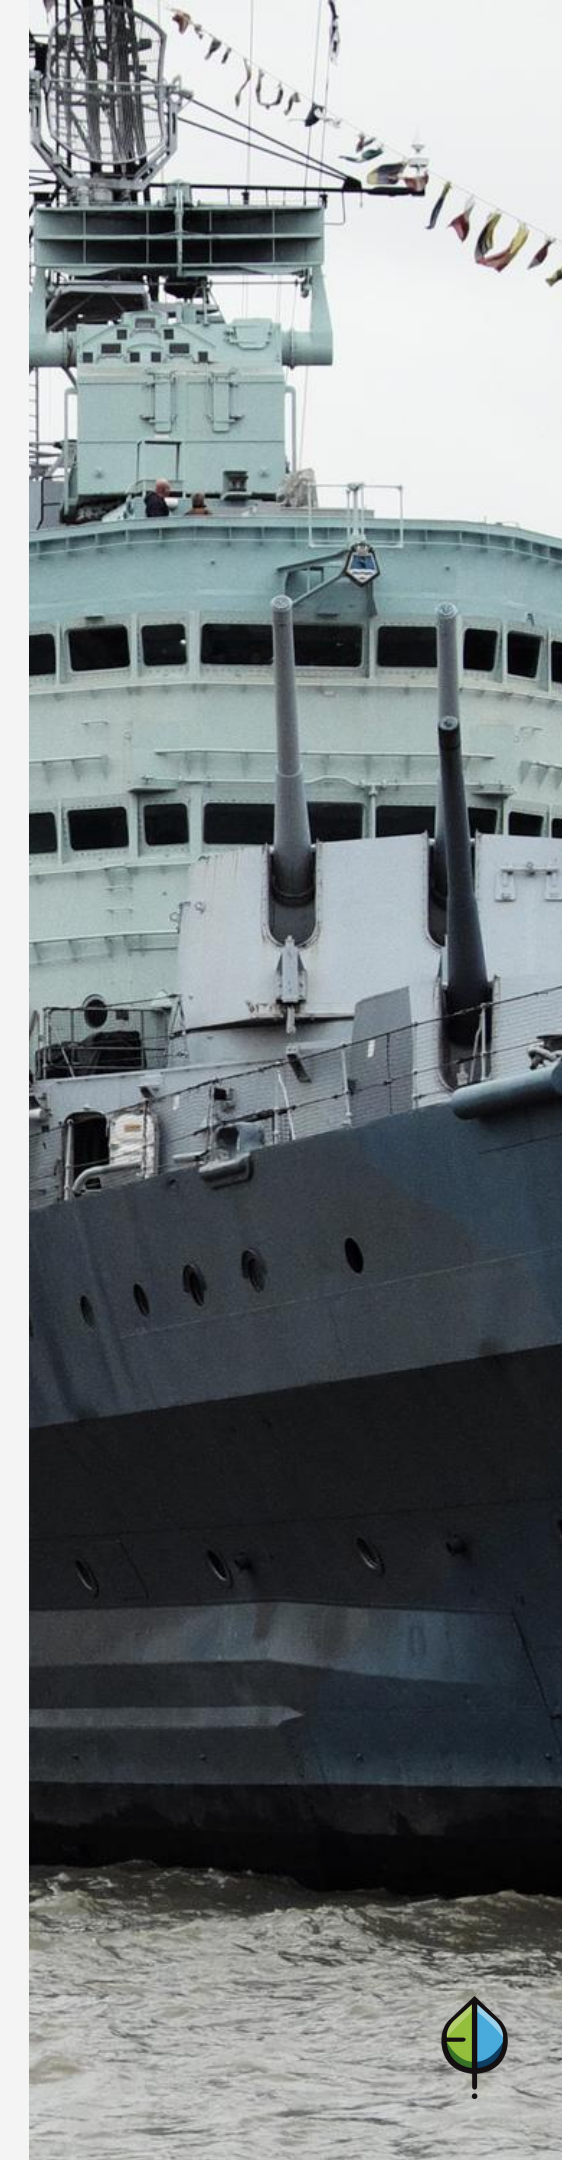

Platforms projects are certified and subjected to testing and commissioning, with the release of the relative documents and data-sheets, facilitating proper maintenance interventions.

We carry out Class II tests with Naval Registers and supply valves with a RINA and ABS declaration of conformity.

CERTIFICATIONS

Platforms provides for the design and implementation of systems according to standards

DIN - UNI - RINA - ABS
